Work authorization: No visa sponsorship required

PROFILE

Full-stack engineer with ~5 years of experience building TypeScript web platforms, working with Next.js and React on the frontend and NestJS, GraphQL and PostgreSQL on the backend and in system design. Most recently, helped migrate container-logistics business logic from a legacy system into a modular microservice architecture at Cyberlogitec. Leverages AI to guide projects toward the right architecture, thinking in systems rather than stopping at an MVP. Now pursuing an MSc in Cloud-Based Software Engineering at VAMK to deepen cloud-native and DevOps skills.

WORK EXPERIENCE

Cyberlogitec Vietnam — Full-Stack Engineer

Feb 2024 – Jul 2026

Equipment Movement Module · *Jun 2024 – Jun 2026 · team of 12*

- Migrated business logic for container, genset and transit-event tracking out of a legacy system into a modular microservice design, making equipment data easier to manage and maintain.
- Built features full-stack: wrote backend services, GraphQL BFF APIs and gRPC methods in NestJS and PostgreSQL, plus the Next.js screens operators use to create, track and update equipment movements.
- Supported QA with reverse queries that find test data in the legacy testing environment, since creating data by hand was impractical: one workflow diagram had nearly 40 nodes, each needing queries for both failing and passing cases to reach the next step.
- Result: brought stakeholders' innovative ideas into the service, allowing users to create up to 10,000 records in a single session.

Stack: TypeScript, NestJS, Next.js, GraphQL, gRPC, PostgreSQL, microservices

Learning Management System · *Feb – May 2024 · team of 9*

- Built an internal LMS full-stack to showcase the company's corporate training offering to prospective clients.
- Led the project end to end, building features full-stack from the UI to the APIs.
- Set up GraphQL codegen for the team, cutting the time spent writing hooks: developers only need to write the GraphQL queries.
- Result: delivered the demo phase on schedule; management approved the product for production launch.

Stack: TypeScript, Next.js, NestJS, GraphQL, Ant Design

Digicommerce — Frontend Engineer

Sep 2021 – Feb 2024

Pharma Distribution Platform (US client) · *Sep 2022 – Feb 2024 · team of 10*

- Developed and operated a B2C storefront, back office and Strapi CMS for a US pharmaceutical distributor offering health-insurance plans across multiple states.
- Restructured the codebase into a monorepo with shared components and a shared API SDK, reducing duplicated components between the storefront and back office and making it easy to reuse search packages across multiple projects.
- Rebuilt legacy CMS features with a simpler content-editing model that became the base for later client projects.

Stack: TypeScript, Next.js, React, Strapi v4, Vite, Material UI 5, monorepo

Hardwood ERP Platform · *May – Sep 2022 · team of 6*

- Maintained and extended customer-facing tools of a B2B ERP for the hardwood industry: log inventory, timber contracts and auction-based procurement.

Stack: TypeScript, Next.js, React, Strapi v3, Material UI 5

B2B Enterprise Demo Platform · *Feb – May 2022 · team of 5*

- Maintained a demo storefront on an Elastic Path backend and resolved CMS issues that blocked sales demonstrations.

Stack: TypeScript, Next.js, React, Strapi v3, Material UI 4

Top Performance Award (Jan 2023) — awarded for joining the development team to ship the product under a critical deadline while, in parallel, restructuring the source code into a monorepo pattern.

SKILLS

Backend	Node.js, NestJS, Express, GraphQL, REST APIs, microservices
Frontend	TypeScript, React, Next.js, Vue.js, Material UI, Ant Design
Data	PostgreSQL, MongoDB, Strapi CMS
Infra / DevOps	Docker, Nginx, Linux server administration, VPS deployment
Languages	Vietnamese (native), English (Proficiency), Finnish (Beginner)

EDUCATION

MSc, Cloud-Based Software Engineering — VAMK, Finland — Aug 2026 – Jun 2027 (exp.)

BSc, Information Technology — Can Tho University, Vietnam — Sep 2017 – Aug 2021

Exchange semester in Taiwan on scholarship (2020); semester merit scholarships (2018, 2019)

INTERESTS

Badminton, board games, Rubik's cube
